

FlatMesh™

Product Data Sheet:

NanoPlus Triaxial Tilt Sensor Node

The FlatMesh NanoPlus is an extremely high precision and exceptionally stable three axis tilt sensor which reports its measurements through Senceive’s FlatMesh wireless communications network to a FlatMesh Gateway.

The FlatMesh NanoPlus comes with Near Field Communication (NFC)™ capability, enabling on the spot interactions with the node.

Successfully applied in many applications, including those measuring:

- Tunnel distortion
- Tunnel heave/settlement
- Embankment slippage
- Structural movement
